

ERP Workflow Requirement Document

Layan Emirates Group

1. Objective

The objective of this document is to define a complete ERP workflow for Layan Emirates Group using the Odoo platform. The system should integrate sales, design, procurement, production, inventory, delivery, CRM, and accounts into one structured workflow. The ERP should ensure that all departments operate through defined procedures with proper tracking, approvals, and reporting.

2. Main Business Workflow

Lead / Enquiry → Design / Concept Stage (Optional) → Proposal / Quotation → Order Confirmation → Procurement or Production → Inventory Management → Delivery → Invoice & Accounts.

3. Enquiry / Lead Registration

All enquiries must be registered in ERP.

Enquiry Types:

- Tender Enquiry
- Normal Customer Enquiry

Source of Enquiry:

- Client Portal
- Email
- Phone Call
- WhatsApp
- Sales Visit
- Walk-in
- Existing Customer

Mandatory Fields:

- Enquiry ID (Auto Generated)
- Customer Name
- Contact Person
- Phone and Email
- Enquiry Type

- Product / Service Category
- Description of Requirement
- Sales Person
- Submission Date
- Attachments

4. Design / Concept Development Stage

This stage is used when the client requires a concept, artwork, branding design, packaging idea, product layout, or mockup before quotation.

Department Responsible: Design Department

Workflow:

Enquiry → Design Request → Concept Preparation → Client Review → Approval → Quotation

Design Status:

- Pending
- In Design
- Internal Review
- Sent to Client
- Revision Required
- Approved
- Rejected
- Completed

Important: Not all enquiries require design. The ERP must include a field called "Design Required (Yes/No)".

5. Proposal / Quotation Stage

After design approval or when design is not required, the system should allow creation of proposals or quotations.

Proposal Types:

- Technical Proposal (mostly for tenders)
- Commercial Proposal / Quotation

Mandatory Fields:

- Proposal Number
- Linked Enquiry
- Customer
- Product / Service

- Quantity
- Price
- Currency
- Validity
- Payment Terms
- Delivery Time
- Prepared By

Proposal Status:

- Draft
- Under Review
- Submitted
- Won
- Lost
- Cancelled

6. Order Confirmation

When the customer confirms the quotation, it should be converted into a Sales Order.

Fields:

- Customer PO Number
- PO Date
- Linked Proposal
- Delivery Date
- Payment Terms
- Order Value

Order Status:

- Confirmed
- In Progress
- Completed
- Closed
- Cancelled

7. Procurement Process

For trading items sourced from suppliers.

Workflow:

Purchase Request → RFQ → Supplier Comparison → Purchase Order → Goods Receipt → Inventory Update

Procurement Status:

- Request Raised
- RFQ Sent
- Supplier Selected
- PO Issued
- Partially Received
- Fully Received
- Closed

8. Production Process

For customized or branded products.

Typical Production Stages:

- Material Preparation
- Printing / Branding
- Fabrication / Assembly
- Packaging
- Quality Check
- Finished Goods Entry

9. Inventory Management

All material movements must be recorded through ERP inventory.

Includes:

- Raw Materials
- Purchased Goods
- Finished Products
- Samples
- Consumables

Transactions:

- Goods Receipt
- Material Issue
- Production Consumption
- Sample Issue
- Stock Transfer
- Delivery
- Returns
- Adjustments

10. Delivery Management

All deliveries must be connected through inventory.

Workflow:

Inventory Pick List → Packing → Delivery Note → Customer Acknowledgement

Delivery Status:

- Pending
- Ready for Dispatch
- Dispatched
- Delivered
- Closed

11. CRM Activity Tracking

Sales team must record activities in ERP.

Activity Types:

- Client Visit
- Phone Call
- Email
- Meeting
- Follow-up

Mandatory Fields:

- Date
- Customer
- Sales Person
- Activity Type
- Summary
- Next Follow-up Date

12. Accounts Integration

Accounts should integrate with sales, purchase, inventory, and delivery.

Functions:

- Customer Invoices
- Supplier Bills
- Payment Receipts

- Expenses
- VAT Reports

Important Reports:

- Sales Report
- Purchase Report
- Stock Report
- Customer Outstanding
- Supplier Outstanding
- Profit & Loss
- Balance Sheet
- Order Profitability
